

SURYA VELRAJ

+91 99946 15264 | suryavelraj0309@gmail.com | Tirupur, Tamilnadu , India | [Github](#)

Motivated Software Developer with strong hands-on experience in full-stack web development using the MERN stack. Skilled in building responsive, user-centric applications with robust backend integrations. Additionally experienced in ServiceNow ITOM, including agent-based (ACC-M) and agentless Discovery. Eager to contribute to innovative development projects while continuously advancing technical and problem-solving skills through real-world, collaborative work.

KEY COMPETENCIES

- MERN Stack Development (MongoDB, Express, React, Node.js)
 - REST API Development & Integration
 - ServiceNow ITOM Discovery (ACC-M & Agentless)
 - ServiceNow Client & Server Scripting (Client Scripts, Script Includes)
 - Technical Documentation , Debugging & Troubleshooting
-

PROFESSIONAL EXPERIENCE(INTERNSHIP)

DOTSITO TECHNOLOGIES, Kangeyam, Tamilnadu

Sep 2024- May 2025

Software Developer Trainee

Contributed as a member of a development team that built and enhanced an HR portal using the MERN stack (MongoDB, Express.js, React.js, and Node.js).

- Helped develop responsive and reusable UI components in React.js to ensure a seamless user experience across devices.
- Assisted in designing and integrating RESTful APIs via Node.js and Express.js for efficient backend functionality.
- Supported the use of MongoDB for flexible schema design and optimized data storage.
- Participated in the implementation of a dynamic Kanban board with features such as:
 - Customizable columns/stages (e.g., "To Do," "Review," "On Hold"), adaptable by department or use case.
 - Drag-and-drop functionality with live state synchronization.
 - Backend-driven board configuration enabling updates without front-end code changes.
- Actively involved in Agile practices, including sprint planning, daily stand-ups, code reviews, and QA testing.

Jira Service Management Customization:

- Collaborated on the customization of Jira Service Management to align with organizational service request workflows.
- Helped configure Kanban boards with dynamic column structures tailored to specific request types
- Contributed to the customization of Jira workflows to control ticket state transitions.
- Worked on automation rules for tasks and email alerts.
- Supported the setup of field configurations, screen schemes, and workflow schemes in the ServiceDesk.

ServiceNow Developer Trainee

- Practical experience with both agent-based (ACC-M) and agentless discovery techniques in ServiceNow ITOM Discovery.
 - Competent in both client-side (Client Scripts) and server-side (Script Includes) scripting for ServiceNow. extensive knowledge of all four stages of the Discovery process, including working with Script Include.
 - Competent in creating, setting up, and overseeing ITOM components, including Credentials, Applications, Discovery Schedules, MID Servers, and Configuration Items (CIs). Troubleshooting skills for fixing ServiceNow platform problems relating to Discovery.
-

TECHNICAL SKILLS

- **Languages:** JavaScript, C
 - **Frontend:** React.js, HTML5, CSS3
 - **Backend:** Node.js, Express.js
 - **Database:** MongoDB
 - **Platform:**
 - ServiceNow (ITOM Discovery, ACC-M, MID Server, Script Includes, Client Scripts)
 - Jira Service Management (Request types, custom workflows, automation, Kanban board configuration)
 - VMware (Virtual machine provisioning, system monitoring)
 - **Tools & Integrations:** Git, Postman
 - **Concepts:** RESTful APIs, Agile Methodology, CSDM
 - **Other:** Database Management Systems (DBMS), Debugging & Troubleshooting
-

EDUCATION

- Erode Sengunthar Engineering College -B.Tech IT - Aug 2021 – MAY 2025 | **CGPA: 8.33**
 - SVKN Higher Secondary School, Tamil Nadu - HSC - Jun 2020 – Apr 2021 | **Percentage: 89%**
 - SVKN Higher Secondary School, Tamil Nadu - SSLC - Jun 2018 – Apr 2019 | **Percentage: 80%**
-

CERTIFICATION & ACHIEVEMENTS

- Micro certification- Introduction to **ServiceNow** | Now Learning
 - Enhanced interpersonal and team collaboration skills through active participation in real-time projects during my internship
 - Introduction to Internet Of Things | **NPTEL**
 - Frontend Web development | **Udemy**
-

PROJECTS

DYNAMIC FORM BUILDER & CRUD SYSTEM

Tech Stack: React, Node.js, Express, MongoDB, Ant Design | [GitHub](#)

Description:

- A fully dynamic form builder and CRUD platform allowing users to create custom data collections, auto-generate forms based on JSON schemas, and manage data seamlessly—all without modifying code manually.
- Form Builder: Build custom forms with support for text, number, email, date, and select inputs, with real-time validation and dynamic schema persistence.
- Dynamic Forms: Render forms dynamically using stored schemas; support for real-time field validation and responsive design.
- CRUD Operations: Perform full Create, Read, Update, Delete operations on dynamic collections with schema-based validation.
- Data Management: Tables and forms are auto-generated from the backend schema and stored in MongoDB collections.
